

LECHLEITER

36th Annual Bull Sale

March 23, 2024 • 1:00 PM

Loma Livestock, LLC • Loma, Colorado

Selling 35 Purebred Simmental Bulls • 75 SimAngus™ Bulls

Profitability starts with High Altitude Bulls that produce calves that will be born alive, stay alive, bring more pounds at sale day with numbers and growth and a maternal bonus for replacements.

www.lomalivestock.com

970-209-8008 (Day) • 970-249-5938 (Evenings)

Hello Fellow Ranchers

Welcome to the Lechleiter Simmental 36th Annual Simmental and SimAngus™ Bull Sale. The sale will be on Saturday, March 23, 2023 at 1:00 pm at Loma Livestock LLC, 1369 12 ½ Road, Loma, Colorado.

We were blessed with a lot of snow last winter and abundant grass and water last summer. The cattle all did great.

We are selling 110 bulls this year. We started culling as soon as they were born and continued through weaning. The calf had to have strong birth vigor and get up and nurse unassisted. We only kept bulls that were trouble free from the beginning. Our herd covers thousands of acres of native range and they have to be athletic, active and ready to work in our mountain country that ranges from 8,000 ft to over 10,000 feet. We evaluate them again at weaning and cull for low weaning weights and poor disposition. All bulls will work at any elevation.

We do not pamper our cattle. They must be able to perform in less than optimal range conditions. The sale bulls have been fed a low-energy, high-roughage diet for better soundness of feet and legs. They are not fat, but are growed up and fleshed to hold up for breeding season. They are ready to go to work.

Our cow herd consists of moderate framed cattle that are maternal, easy fleshing and have extremely good udders. The cow herd has to survive on high mountain pasture, dry fall pasture and winter corn stalks and maintain their body condition all the while raising a calf.

All of the bulls being offered for sale have been Fertility, Trich, Bangs, BVD/PI by Dr. Bob Bessert of Fruita, Colorado. The bulls have also been PAP tested for high altitude by Dr. Jeremy Ley of Canyon City, Colorado. We also want to thank Dr. Nicki Seehafer of Horsefly Creek Veterinary Services and Dr. Jeff Burnham for pregnancy testing and all of our herd health needs day or night.

The bulls in the sale have high EPD numbers for Calving Ease, Maternal Calving Ease, Stayability and the API and TI (\$All Purpose Index\$). If you are looking for genetics that offer excellent calving ease, performance, maternal traits with top gainability and carcass merit, we offer this and more.

We will feed the bulls until April 15th at the ranch free and after April 15th there will be charge of \$3.00 per day.

Guarantee: All bulls selling are guaranteed for fertility for the first breeding season. In the event a bull is deemed unsatisfactory the bull may be returned for a replacement bull of equal value or a credit in the amount of purchase price. Please contact me about any issues prior to culling the animal. A signed veterinary statement may be required.

Bid online at www.cattleusa.com.

We look forward to seeing you at the sale.

Kim Lechleiter

EPD Definitions

API (All Purpose Index): Dollars per cow exposed under an all-purpose sire scenario.

BF (Back Fat): Inches of carcass back fat at 475 days.

BW (Birth Weight): Pounds of birth weight.

CE (Calving Ease): Percent unassisted births when used on heifers.

CW (Carcass Weight): Pounds of carcass weight at 475 days.

MCE (Maternal Calving Ease): Percent of unassisted births in first-calving daughters.

MM (Milk): Pounds of weaning weight due to milk.

MB (Marbling): Carcass marbling score at 475 days.

MWW (Maternal Weaning Weight): Pounds of weaning weight due to milk and growth.

STAY (Stayability): Percent of daughters remaining in the cowherd at six years of age.

REA (Ribeye Area): Square inches of carcass ribeye at 475 days.

TI (Terminal Index): Dollars per cow exposed under a terminal-sire scenario.

WW (Weaning Weight): Pounds of weaning weight.

YW (Yearling Weight): Pounds of yearling weight.

YG (Yield Grade): Carcass yield grade score at 475 days.

All bulls tested
BVD/PI negative

P.A.P. or Pulmonary Artery Pressure – in an indication of a bull's ability to thrive at high altitudes. The higher the PAP score the lower the altitude the bull should be maintained at. Bulls that develop brisket may or may not have a genetic problem, but may be the result of sickness, feed or stress. We recommend that bulls with a PAP of greater than 48 be used at lower altitudes.

Horned: An animal with a horn growth affixed to the skull that has or has not been removed.

Polled/Scurred: An animal with rudimentary horn growth that will not develop into a horn. The rudimentary horn growth may or may not become affixed to the skull at an older age.

Polled: An animal with absence of horn growth. (An animal can have scurs and still be genetically polled).

Double Black: An animal whose sire and dam are both black, which give the animal the possibility of being homozygous for the black trait but its not yet proven so.

Homozygous Black: An animal who carries two black genes and has been proven by mating or genetically tested to produce black calves with every mating.

This image shows a decorative notebook page. The background is a light beige color with a faint, stylized illustration of a mountain range. The page is framed by a dark red border with a repeating pattern of small, gold-colored studs. The text '~ NOTES ~' is centered at the top in a dark green, serif font. Below the title, there are 20 horizontal green lines for writing, arranged in two columns of ten. The overall design is elegant and classic.
