SELLING:

66 YEARLING BULLS • 20 OPEN HEIFERS

Welcome to the

Ellingson Simmentals

25th Anniversary

Performance Bull and Female Sale

Dear Friends,

It is my pleasure to welcome you to our 25th Annual Production Sale, I would like to thank you for your interest and support since we began breeding Simmentals in 1990. Because of your inspiration for us to develop quality cattle to improve your operations, I have enjoyed every minute of our breeding adventure! Our original goal was to raise Simmentals with high performance and eye appeal, and now we also focus on calving ease and high carcass traits, due to the focus on API and TI of many of our commercial customers. In order to do this, we constantly are on the look for new genetics that will meet our customers needs. We use AI and embryo transfer to help us achieve these goals.

The purchase of the US semen rights on R Plus Yuma 9087G after he was sold to LaBatte Simmentals and Circle 7 Ranch for \$150,000 was a big step to bring in new genetics. His offspring are high performance with extra length needed for the pounds we are looking for. When the R Plus Simmentals held their dispersal sale in December of 2023, his dam was lot one and we were fortunate to be able to purchase her and put her into our embryo production program, where she has done very well. Lots 1 and 2 are full brothers to R Plus Yuma 9087G.

One other cow that will have a big impact on future sales is HHS Georgia 802G, she does amazing in transplant, averaging 23 frozen embryos in 20 flushes, her last freeze was 59 embryos out of RF Caliber 014G.

We thought we were going to be extremely dry when April started, but the May rains came and resulted in some seeding delays, with abundant pastures and hay crop and very good fall crops also. The lush pastures may have held back the bull calves gains a bit, but they are coming on strong once they hit the feed lot. They are on a ration of 8 pounds of corn/distillers, 20 pounds of corn silage, 6 pounds of chopped alfalfa and free choice grass hay. Great for growth, longevity and strong feet development.

The entire calf crop is on the American Simmental Association Calf Crop Genomics program, with DNA testing using the GGP-LD Genomics test, it verifies parentage and gives us genomically enhanced EPD's that are similar to an animal that has 10 – 25 progeny for calving ease, weaning and yearling weight and 22 birth weight measurements, improving the accuracy of the EPD's you are looking for. We also have them test to see if they are homozygous or heterozygous for color, the polled gene and dilution. Our cow herd has gone through the Cow DNA Roundup program to verify parentage and improve accuracy. We also participate in the ASA Total Herd Enrollment program which improves accuracy. In the past we have been awarded the Performance Advocate award to these measurements.

All bulls and heifers will have had ultrasound measurements for rib eye size, marbling and backfat, and this data will be available on line and at the sale. The bulls will be semen tested with scrotal measurements. You can find this information at ellingsonsimmentals.com or DVAuction.com which will also have the catalog on line along with individual videos of each lot. Be sure to register with DVAuction early if you are interested in viewing and bidding with this method.

We invite your inspection of our herd before the sale and welcome you on sale day with a meal starting at 11 AM at the Ellingson Event Center at the farm. If you cannot make it to the sale and prefer not to bid on the internet, we will have people to man phones available for you to use, please contact myself, Bryan Strommen or my herdsman Bryan Haugen ahead of time so we can have someone on the phone with you.

Once again, as we celebrate 25 years of performance sales, we thank-you for your support and interest in our breeding program. Let us know if we can be of assistance in your sale selection process or if you have any further questions.

Thanks again and God Bless. **Terry Ellingson**

Sale Schedule

January 1 – 24 View cattle at the farm or on video

January 24

11:00 am - Lunch at the Ellingson Event Center

1:00 pm - Performance Bull and Female Sale.

Terms of Sale

All sales are cash on day of sale.

Conditions of Sale

All animals are sold in accordance with guidelines of the American Simmental Association. Copies are available at the sale.

Volume Discounts

Purchase 3 bulls-3% discount, four bulls 4% discount, five or more bulls 5% discount. No discount on heifers.

Health Comments

Ellingson – Birth-Bovilis Nasalgen 3, Alpha 7, Bovilus Coronavirus ; Pasture-Bovishield Gold One Shot, Bovilus Vision 7 Somnus; Weaning-Bovishield Gold One Shot, Bovilus Vision 7 Somnus, Clean- Up II, Valbazen wormer; Booster- Express 5- HS, Bovilis Once PMH SQ, Heifers Bangs Vaccinated; Herd is participating in ND Voluntary Johne's Disease Status program, Status negative level A

Announcements

Announcements on sale day take precedence over printed material.

Insurance

Insurance will be available sale day.

Risk

All animals are at purchaser's risk after sold. Anyone attending this sale attends at his or her own risk.

Guarantee

Bulls are guaranteed to have passed a semen test and are guaranteed for one breeding season.

Trucking

Haul your bulls home sale day and receive a \$100 per head discount. Free delivery within North Dakota or 250 mile radius if delivered by April 15. Bull delivery begins approximately April 1. We do not deliver heifers, please make arrangements to haul heifers to your ranch soon after the sale.

Registration Papers

Papers will be provided to purchaser after the sale.

Feeding

We will feed your bulls for \$3.00/day beginning April 1. We are not responsible for accidents to your bull during this time. We recommend taking insurance, please see Jeff Thomas.

Semen Interest

We reserve one third revenue sharing semen interest in all bulls. We reserve the right to collect 100 units of semen for in herd use at your convenience and our expense.

Canadian Buyers – We will guarantee cattle pass health requirements and will deliver your purchases to border crossings in ND. All export fees need to be paid by buyer for purchases under \$2,500.

Motels

Alexander House, Park River, ND 701-284-7141

Sunlac Inn Hotel, Lakota, ND 701-247-2487

Motels to east in Grand Forks and to west in Devils Lake.

MWW:	59.6	TI:	73

Miss R Plus 3007A -reference dam- She was a sale feature in the 2023 R Plus Dispersal sale in Canada, we were fortunate to purchase her, we had previously purchased the US semen rights on her son R Plus Yuma 9087G who had sold for \$150,000 to laBatte Simmentals and Oberle Brothers in 2020. Her solid red daughter in the dispersion that is a full sister to Yuma brought \$130,000. She is recognized as one of the superior cows in the Simmental breed.

R PLUS YUMA 9087G

ASA# 3979132

He is sired by the great R Plus 5015C and his dam is the superior Miss R Plus 3007A, he sold for \$150,000 in the 2020 R Plus sale. He has sired sale toppers in sales across Canada and the US, and his red full sister brought \$130,000 in the R Plus dispersal. He sires extra length with scale bending performance and great dispositions. His first daughters calves in our herd rose to the top of the pen in performance.

MWW:	76.1	TI: 106

A homozygous polled, homozygous black son of LBRS Genesis G69, whose dam is an own daughter of LFE The Riddler, who has left us with many excellent progeny. He weaned off his dam at 938 pounds with an adjusted 205-day WW of 833 pounds, and tied for third highest weight per day of age at 3.9 pounds. No wonder his API and TI values are so impressive.

MWW:	75.8	TI: 80

This homozygous black, homozygous polled son of Lcdr Diligence is flat out impressive, he weaned off his dam at 927 pounds to have an adjusted 205-day WW of 821 pounds, sixth highest in the pen, fifth highest adjusted yearling weight at 1484 pounds, the third highest WDA at 4.0 pounds per day and tied for sixth highest ADG at 4.1 pounds per day. His dam is one of my favorites, a result of the 680S/Preferred Beef crosses, which flat out works! If you want cattle with the numbers and the look, here he is!

Another homozygous polled, cherry red daughter of Rockin H Captivate J75, he is big framed, long bodies but sires calving ease with performance. Her dam is an embryo daughter of IPU Bentley and Ellingson Faith F813 who sold for \$40,000 in Louisville.

Quick Reference to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more *weaning weight* than B. If calving ease were the trait, A would be expected to sire 15-percent more *unassisted births* in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

Average Daily Gain (ADG): Pounds of post-weaning daily weight gain.

Back Fat (BF): Inches of backfat.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight.

Docility (DOC): Percent of offspring achieving a docile (1) score.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Yield grade score.

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the population. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.

What a unique opportunity to purchase a red or black full brother to R Plus Yuma 9087G, who sold for \$150,000 in the 2020 R Plus Bull Sale to LaBatte Simmentals, their full sister sold for \$130,000 in the 2023 R Plus dispersal sale, the homework is done.

We are located halfway between Grand Forks and Devils Lake. If you are coming from the east on Highway 2, turn north ten miles on Highway 32, turn west on GF County #1 three miles, turn south on Nelson County #14 one quarter mile (gravel) and west one half mile. From the west on Highway 2, turn north at Michigan on #35, go nine miles north to Nelson County #1, go nine miles east to Nelson County #14 (gravel), turn south one quarter mile, then one half mile west.

Please note: Some GPS systems take you north of Dahlen to get to our address, be sure to turn south of Dahlen to get to the farm. We are the first farm south of Dahlen.
