February 2, 2026 • 1:00 PM

Bell Ranch • Fordville, ND

Selling over 100 Yearling & Coming of Age Bulls plus 250+ Bred Heifers

Can't make it to the sale? Join us on [DVAuction](#)

Bell Simmentals

Welcome ranchers to the 10th Annual Bell Simmental Sale! As we reflect into 2025 all I can think of is what a *Wild Ride*. Historic times with cattle prices that add stress, excitement and hopefully profit to all our pocketbooks. As I reflect, I usually find a quote of something off a movie or some sort of reading. This year the one that caught my mind was the Movie "Broken Trail" with Robert Duvall.

*"We're all travelers in this world. From the sweet grass to the packing house.
Birth 'til death. We travel between the eternities".*

Some of you may read this and not think much of it but in my life, I've stopped and thought many times of all of our purposes here. Cattle business or farming we have our stressful times, floods, fires, blizzards, droughts; these are disasters that Mother Nature throws at us and it either breaks us or strengthens us. I look at it as we are playing the "Game of Life". There are many levels of this game and the work we do each day to make our profit or say "points" for the high score. Our families look at us as the Team in the business to succeed and make it enjoyable and yes profitable.

My goal in this game is to keep pushing myself to make our customers and myself profit; to let the cattle work for us and we do not work for them. I feel no matter what the profit or how this game ends, we are in this business because of our enjoyment, dedication and passion that drive us every day to do what we do. Historic lows in the cattle population prove to us that there are less of us doing it each year and we need to take each level of our lives and continue pushing ahead to make it enjoyable and pass on this great game we us ranchers are all doing together.

We are excited about the offering in the coming-of-age bulls as they are truly the stoutest set of bulls that we have sold yet; a handful of these bulls were used on heifers, neighboring ranches and will be marked plus tested for any carrying diseases if they are not virgin Bulls.

Yearling bulls continue the quality and are a very even set of Bulls with plenty of difference in sire selection to pick from.

Bred heifers offered are solid sets from known ranches that we have sorted and will sell again to calving dates and ranch oriented.

We continue to ask for feedback from all are customers on how we can help your program out so that you may prosper in any way.

We thank our Great customer base that grows every year to make this game we call life and cattle business the Greatest Game ever Played.

God Bless
See You Sale Day!

Announcements

Announcements on sale day take precedence over printed material.

Conditions of Sale

All animals will be sold in accordance with the suggested guidelines of the American Simmental Association and are available by request.

Terms of Sale

All sales are cash on day of sale.

Insurance

We recommend buying insurance to protect your purchase. Two Options:

- A. Purchase insurance through Martin Trudeau Livestock from Mitchell, SD. They will be on-site sale day for you to purchase or if you have questions after please call them at 605-996-3106.
- B. Purchase insurance through Bell Simmentals for \$300/head that covers a 6-month insurance policy for death and injury. This must be purchased on sale day!

Buyer Discount

5 or more bulls gets 3 % discount.

10 or more bulls gets 5 % discount.

Haul your bulls home on sale day and receive a \$200/head discount.

Delivery

2-year-old bulls will be delivered within 10 days of the sale unless winter arrangements have been made.

Yearling bulls will be delivered April 1st or after; any bulls shipping to Canada will be delivered to closest port of entry.

Bred heifers will need to be picked up within 7 days of the sale unless arrangements have been made with sale staff. Buyers responsible to haul out Bred heifers. Bells Simmentals will assist on finding trucks to get heifers to new homes.

Wintering

Winter arrangements are available on 2-year-old Bulls for \$300 per head until April 1st.

Herd Health

All 2-year-old Bulls will be tric tested. All females have been vaccinated for brucellosis. All cattle are current on all shots. Bred heifers will have one round of vira-shield 6 v15 hb and round of guardian prior to sale

Breeder Guarantee

Bulls are guaranteed as breeders, if failing to be satisfactory they must be reported to us during breeding season

Semen Interest

Bell Simmentals is retaining one third semen interest on all bulls. Full possession and salvage belong to the buyer unless otherwise stated.

WDA	4.3
Scrotal	42.0

Out of a first calf heifer that the kids showed this McIlroy daughter hit a home run. Weaned at 904# actual wean weight with great eye appeal. Black tracker was a bull we leased from Robert Ellingson and we sure are glad we did, he was a powerful 7 frame bull that we used on 2nd calvers, and all calves ranged from a consistent 84-88# birth weight. If you're looking for a bull to add power and keep calving ease don't let this one slip by.

Employees of Edgewood Ranch / Bell Simmentals

< Ethan Prevost

Ethan, my nephew, has been with us since 2018. He came to us after he graduated from High School and is a huge asset to this operation. His dedication, solid work ethic, and passion is irreplaceable. Truly grateful for him and all he does around the farm and our relationship throughout the years.

Matt O'Neil >

Matt and I go back to school age and has been a great friend and now employee. Matt does most of the trucking for us including hauling cattle, hauling feed and any other job that is needed around the farm. With a herd of his own - his cattle sense is nice to have around. Truly an asset.

~ YEARLING BULLS ~

Rachel, pictured with her son Levi, does our cattle bookwork and marketing

the kids

When the kids aren't in the barn and helping me with various tasks around the ranch they are excelling in their own ways. Lane is teaching Agriculture / Shop at Park River High School. This past year he took the FFA kids on a week-long trip to Indianapolis and had a blast. Kodi is in her second year of college at North Dakota State University in Fargo, ND where she is fully involved in their livestock judging program and Saddle & Sirloin. Cale, a freshman in High School this year, is fond of fashion, cattle, four wheeling and playing hockey.

Bomber calves have always been cowboy kind, they tip the scale down every time one comes across. C5 cow has proven to us that her power is worthy, and these Bomber bulls prove it. Micheal Bibberdorf claims his Bomber Bull bought in 2025 is one of his all-time favorite Bulls. Exact same matings as what we are offering here. Embryo

This bomber bull was shown at the North Dakota State Fair. He is a super muscle and docile bull. As you can see in the picture, he is broke to ride. He is moderate framed. You don't want to miss out. Embryo

PERFORMANCE
LIVESTOCK ANALYTICS

part of **zoetis**

Performance Beef makes it easy to:

- Manage feed and other inventory
- Track and monitor health
- Generate closeouts and invoices
- Analyze trends in feed efficiencies, costs and performance

GET A DEMO

Call 515-686-4086 or visit
PerformanceLivestockAnalytics.com

“

Performance Beef keeps track of everything we put into our cattle - from feed to vaccinations - making our life so much easier. It has been a huge time and cost savings for our business. I highly recommend it to anyone who feeds cattle.

”

- Travis Bell, Edgewood Ranch

Quick Reference to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-*pounds* more *weaning weight* than B. If calving ease were the trait, A would be expected to sire 15-*percent* more *unassisted births* in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

Average Daily Gain (ADG): Pounds of post-weaning daily weight gain.

Back Fat (BF): Inches of backfat.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight.

Docility (DOC): Percent of offspring achieving a docile (1) score.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF):

Pounds of force required to shear a steak.

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Yield grade score.

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the population. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.

Reference Sires

~ NOTES ~

This image shows a single sheet of cream-colored paper with horizontal ruling lines. The paper has a slightly textured appearance with some minor discoloration or foxing. There are ten horizontal lines visible, creating nine equal-sized rectangular sections. The lines are evenly spaced and run across the width of the page. The overall tone is a light beige or off-white.

Meet the Bell Family

Arden & Marcy Bell
(Dad & Mom)

Dad retired from ranching a couple years ago and is now the solid giver of advice when it comes to purchasing cattle and breeding. This year he is recovering from hip surgery and is improving more each day. When he's not home he's out supporting the grandkids watching their sport activities, 4H shows and fair endeavors. Mom lives in Grand Forks where she is receiving assistance at Edgewood memory care.

Angie, Bailey, and Peyton Schroeder

Angie is the older sister of the two and currently employed at Polar Communications as a Customer Service & Billing Manager in Park River, ND. Bailey her eldest daughter is an Extension Agent with NDSU in their Park River office. Both are a tremendous asset to the farm and help whenever they are able. Peyton is Angie's youngest and just graduated from Mayville State University with a double bachelors in Elementary Education and Special Education. Extremely proud of all her accomplishments thus far.

Family is the key to success and each and everyone no matter how small or large their contribution is always appreciated.

Chris, Sharon and
Parker Lipsh

Sharon the 2nd sister is currently residing in Grand Forks, ND with her husband Chris and son Parker. Sharon works for the City of Grand Forks as their Public Works Director. Chris a recent graduate of the University of North Dakota with a masters in Public Administration is working for the state as a Juvenile Court Officer. Their son Parker when not in school as a 5th grader is playing hockey in the winter and baseball in the summer months.
