SELLING:

56 YEARLING BULLS • 19 HEIFERS • 7 EMBRYO LOTS

Welcome to the

Ellingson Simmentals

26th Annual

Performance Bull and Female Sale

-Dear Friends,

It is my pleasure to welcome you to our 26th Annual Production Sale, I would like to thank you for your interest and support since we began breeding Simmentals in 1990. In addition to my goals of improvement with the breed, you have challenged me to seek out the best genetics available so that you can bring cattle back to your herd that will make improvements also. Our original goal was to raise Simmentals with high performance and eye appeal, in addition we now also focus on calving ease with exceptional carcass traits that results in high API and TI that is sought for in our commercial producers. In order to achieve these goals, we utilize artificial insemination and embryo transfer from North American genetics.

We have been flushing two donor cows that will provide exciting genetics, both in this sale and the future. HHS Georgia 802G checked the boxes we were looking for in a donor cow when we purchased her from Robert Fitzpatrick, unfortunately we lost her this year but her genetics will live on through her embryos, this may be the last sale we will offer any of her embryos. Miss R Plus 3007A has progeny and embryos in the sale, the lot one female in the R Plus Dispersion in 2022, she has offspring that have sold for \$150,000 and \$130,000 in previous sales, her age may limit how many more embryos we can sell, take advantage of this years opportunity to buy some.

We had an amazing crop year, the rains came at just the right times with no damage, which resulted in yields that we had not seen before. The lush pastures provided a good growing season for the calves. Once the bulls were weaned, they received a 46 Mcal ration, with only 7 pounds of corn/distillers and a pound of supplement, along with corn silage, chopped alfalfa and free choice mixed hay. This will guarantee long lasting bulls with no feet issues.

The entire calf crop is on the American Simmental Association Calf Crop Genomics program, with DNA testing using the GGP-LD Genomics test, it verifies parentage and gives us genomically enhanced EPD's that are similar to an animal that has 10-25 progeny for calving ease, weaning and yearling weight, and 22 birth weight measurements, improving the accuracy of the EPD's you are looking for. They are also tested to see if they are homozygous or heterozygous for color, the polled gene and dilution. Our cow herd has gone through the cow DNA Roundup program to verify parentage and improve accuracy. We also participate in the ASA Total Herd Enrollment program which also improves accuracy. In the past we have been awarded the Performance Advocate award for these measurements.

All bulls and heifers will have had ultrasound measurements for rib eye size, marbling and backfat, this data will be available online and at the sale. The bulls will be semen tested with scrotal measurements. You can find this information at ellingsonsimmentals.com or DVAuction.com, which will also have the catalog on line with individual videos of each lot. Be sure to register with DVAuction.com early if you are interested in viewing and bidding with this method.

We invite your inspection of our herd before the sale and welcome you on sale day with a meal starting at 11 AM at the Ellingson Event Center at the farm. If you cannot make it to the sale and prefer not to bid on the internet, we will have people to visit with you on the phone, please contact myself, Bryan Strommen or my herdsman Bryan Haugen ahead of time so we can have someone on the phone with you.

Once again, as we celebrate 26 years of performance sales, we thank-you for your support and interest in our breeding program. Let us know if we can be of assistance in your sale selection process or if you have any further questions.

Thanks again and God Bless. **Terry Ellingson**

Sale Schedule

January 1 – 23 View cattle at the farm or on video

January 23

11:00 am - Lunch at the Ellingson Event Center

1:00 pm - Performance Bull and Female Sale.

Terms of Sale

All sales are cash on day of sale.

Conditions of Sale

All animals are sold in accordance with guidelines of the American Simmental Association. Copies are available at the sale.

Volumn Discounts

Purchase 3 bulls-3% discount, four bulls 4% discount, five or more bulls 5% discount. No discount on heifers.

Health Comments

Ellingson – Birth-Bovilis Nasalgen 3, Alpha 7, Bovilus Coronavirus ; Pasture-Bovishield Gold One Shot, Bovilus Vision 7 Somnus; Weaning-Bovishield Gold One Shot, Bovilus Vision 7 Somnus, Clean- Up II, Valbazen wormer; Booster- Express 5- HS, Bovilis Once PMH SQ, Heifers Bangs Vaccinated; Herd is participating in ND Voluntary Johne's Disease Status program.

Announcements

Announcements on sale day take precedence over printed material.

Insurance

Insurance will be available sale day.

Risk

All animals are at purchaser's risk after sold. Anyone attending this sale attends at his or her own risk.

Guarantee

Bulls are guaranteed to have passed a semen test and are guaranteed for one breeding season.

Trucking

Haul your bulls home sale day and receive a \$100 per head discount. Free delivery within North Dakota or 250 mile radius if delivered by April 15. Bull delivery begins approximately April 1. We do not deliver heifers, please make arrangements to haul heifers to your ranch soon after the sale.

Registration Papers

Papers will be provided to purchaser after the sale.

Feeding

We will feed your bulls for \$3.00/day beginning April 1. We are not responsible for accidents to your bull during this time. We recommend taking insurance, please see Jeff Thomas.

Semen Interest

We reserve one third revenue sharing semen interest in all bulls. We reserve the right to collect 100 units of semen for in herd use at your convenience and our expense.

Canadian Buyers – We will guarantee cattle pass health requirements and will deliver your purchases to border crossings in ND. All export fees need to be paid by buyer for purchases under \$3,500.

Motels

Alexander House, Park River, ND 701-284-7141

Sunlac Inn Hotel, Lakota, ND 701-247-2487

Motels to east in Grand Forks and to west in Devils Lake.

A homozygous polled cherry red son of Ellingson Ace J183. Ace was the high seller in our 2022 sale to Steve and Kelly Hoffart of Knox, where his standout calves made us use him in our herd. Ace had a 932 pound adjusted 205 day weaning weight, a 1645 pound yearling weight and a 19.83 inch ribeye. N501 has the same qualities as his sire, he has an impressive set of performance EPD's! He had our seventh highest average daily gain (4.2 pounds per day).

A homozygous polled, homozygous black son of Wheatland Bull 680S. A great combination with Black Joker on the dam side and 680S on the sire side, both are breed greats that provide the outstanding conformation and performance that astute breeders are looking for. Stack the deck with this herd sire prospect, he is recommended for cows.

ELLINGSON ANTHEM N559

ASA# 4533722

Owned by: ELLINGSON SIMMENTALS • Homo Polled PB Bull

Tattoo: N559 • Birthdate: 2025-02-14 • Act. BW: 78 lbs. • Adj. BW: 78 lbs

MM:	22.4	API:	142
MWW:	68.8	TI:	94

This LCDR Anthem 33K sired embryo son of Miss R Plus 3007A, is homozygous polled and homozygous black. Here is a full brother to the three September embryo bull in the sale, he shows the same potential, great length, depth of rib and backed by solid performance from both sides. Anthem adds low birth weight, calving ease, high performance with great carcass and maternal traits. His mother was the dominant production cow at R Plus Simmentals in Canada.

MM:	33.2	API:	174
MWW:	71.3	TI:	94

A homozygous polled, homozygous black son of Hook's Galileo 210G. This may sound like a broken record, but I really think the Galileo cross on Honor females is the real deal. Galileo is a no miss sire of proven calving ease and exceptional growth, depth of rib and natural thickness. A look at his carcass traits will prove why his API is 174 and his TI is 94. Hard to pick a favorite, they are all good!

MCE:	4.6	Stay:	15.3
MM:	18.7	API:	125
MWW:	63.4	TI:	81

A dark cherry red homozygous polled son of R Plus Estevan 2162K. He has our eighth highest average daily gain (4.2 pounds per day). If a picture is worth 1000 words, I could stop here. This bull is so phenotypically correct, plus he has excellent calving ease without sacrificing growth and performance.

Hook's Galileo 210G

Galileo is homozygous black and homozygous polled, a three quarter blood that sires real world calving ease with exceptional growth. He has an impeccable EPD profile, extra physical frame, big spread from CE to YW and is in the top 1% EPD for milk, MWW, Marbling API and TI.

RF Caliber 014G

He was the high seller in the 2021 Rancier Farms Sale, sires breed leading performance and powerful phenotype with tremendous maternal power. The bottom side of his pedigree boasts five donor females. He stamps his progeny with extra middle, sound structure with great hair, his first daughters have beautiful udders.

WS Marvel 8M

Was the high selling bull at the 2025 Wilkerson Farms bull sale, he offers a rare combination of unmatched phenotype, power and elite data package. Marvel will inject mass, dimension and body capacity while posting a 198 API and 118 TI, with plus .95 marbling, 103 WW and 166 YW.

KBHR Revolution H071

A blaze face black bull, who sires elite growth and carcass genetics, siring calves with extreme length and muscle. He excels in CE, BW, WW, YW, Marbling, API and TI. His daughters are very maternal and feminine.

Bridle Bit Recharge K256

Known for siring balanced genetics, adds value for calving ease, growth, carcass quality and maternal traits.

R Plus Yuma 9087G

He sires progeny with exceptional growth, length, depth, high carcass traits, wonderful docility with a stylish overall look.

LBRS Genesis G69

He offers complete, fault free genetics for growth, maternal and carcass.

Quick Reference to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more *weaning weight* than B. If calving ease were the trait, A would be expected to sire 15-percent more *unassisted births* in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

Average Daily Gain (ADG): Pounds of post-weaning daily weight gain.

Back Fat (BF): Inches of backfat.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight.

Docility (DOC): Percent of offspring achieving a docile (1) score.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Yield grade score.

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:
All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ($\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the population. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids — our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.
